Summary

Software Development Engineer aspirant with hands-on experience in full-stack web development, frontend and backend engineering, and data-driven systems. Proficient in building scalable applications using React.js, Node.js, Express.js, and SQL/NoSQL databases. Strong foundation in Data Structures and Algorithms, OOP, RESTful API design, and system architecture, with experience collaborating in team-based projects and delivering production-ready solutions.

Technical Skills

Languages: C, C++, JavaScript/TypeScript

Frontend: React.js, Tailwind CSS, Bootstrap, HTML5, CSS3

Backend & APIs: Node.js, Express.js, RESTful APIs

Databases: MongoDB, MySQL, PostgreSQL (schema design, joins)

Deployment: Vercel, Railway, Render

Tools & Platforms: Git, GitHub, VS Code, Neon, Postman

Core CS: Data Structures and Algorithms, OOP, DBMS, API Design, System Architecture

Projects

Legal Query Platform (MNLU Collaboration)

React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Built a full-stack platform with **10+ pages** enabling users to submit legal queries and receive responses from law students.
- Implemented an admin panel handling **user management, query tracking, content updates, and resolution workflow**.
- Coordinated development within a **6-member cross-college team**, performing requirement analysis and task distribution.
- Managed MongoDB collections for **100+ queries** using indexed search and role-based access control.

Hostel Management System – Veranda

React.js, Node.js, Express.js, PostgreSQL, Tailwind, Neon

- Engineered an end-to-end hostel workflow system comprising **6 functional modules** including complaints, transport, mess, inventory, polls, and marketplace.
- Designed **role-based interfaces** supporting **admin and student users** with permission-controlled access.
- Built and normalized **10+ PostgreSQL relational tables**, ensuring data integrity and scalable schema design.
- Digitized mess menu management by enabling **direct updates from mess staff**, eliminating monthly PDF circulation and reducing menu update latency from **days to real-time**.

Student Placement Prediction System

Python, Random Forest, Pandas, React.js, Node.js

- Trained a **Random Forest classifier** on **3000+ student records**, achieving **88.55% prediction accuracy**.
- Performed feature engineering on **7+ academic and skill-based attributes** to improve model performance.
- Deployed the system using a **React frontend and Node.js backend** for real-time predictions.

Airbnb Lite (Booking Platform)

Node.js, MongoDB, HTML, CSS, Bootstrap

- Developed a booking platform supporting **50+ property listings** with search, filtering, and detailed views.
- Implemented secure authentication and session management using **Passport.js**.
- Implemented server-side rendering with **EJS templates** enabling reusable layouts and consistent rendering across routes.

Education

B.Tech in Computer Science and Engineering, Indian Institute of Information Technology, Nagpur Aug 2023 – Aug 2027

CGPA: **7.73 / 10**

Senior Secondary (Class XII), Gautam Public Sr. Sec. School, CBSE

Jul 2020 – Jul 2022

Score: **89.6%**

Achievements

- Solved **380+** Data Structures and Algorithms problems on **LeetCode**.
- Achieved a peak **CodeChef rating of 1473**.
